

LANDMARK LIFE COACHING

TOP 5 WAYS TO LIVE YOUR LIFE'S PURPOSE

We all are born into this world for a specific purpose. As we are raised we are trained to be focused on what we will do for a job and be a productive member of society. I've heard so many parents say I just want my child to be able to make good money and live a comfortable life. All of that may sound good for living a life of ambition but doesn't lead to serving others and living a life of meaning. Our Life's purpose may very well lead to a nice income and comfortable life style....but it may not.

1. **It's in your heart, not your wallet.** Your life purpose is something that comes from inside, you feel it in your heart every day and it battles with the external world telling you otherwise.
2. **Focus of serving others.** Our life purpose should be focused on how we can take our God given talent and use it for the benefit of others.
3. **Understand and practice your God given talent.** Don't let your talent be used only for your own personal gain, share it with the world around you.
4. **Make the world aware of your God given talent.** Find ways to ensure that as many people possible know you have this talent and its available to serve them.
5. **Be open to all needs.** Ensure you are aware of and open to all needs that can be serviced and do all you can to provide some type of service.
